

Membrane Pusher Tool

Complete Water Solutions introduces the new RO Membrane Pusher Tool. This tool was developed to help remove 8" membranes safely from RO housings. Over the years we realized some membranes are difficult to remove from the RO System. Removing fouled membranes or full fit membranes can be difficult and present safety risks. The RO Membrane Tools comes with 2 options for materials of construction, stainless steel and aluminum. The tool comes with both stainless-steel housing adapter and fiberglass housing adapter.

Part Number	Description
MEM600S	Complete Water Solutions Membrane Pusher Tool - Stainless Steel Construction Unit comes with the following: Ram Assembly, (6) Spool Pieces, Stainless Steel Cart, Stainless Steel Housing Adapter, Fiberglass Housing Adapter
MEM600A	Complete Water Solutions Membrane Pusher Tool - Aluminum Construction Unit comes with the following: Ram Assembly, (6) Spool Pieces, Stainless Steel Cart, Stainless Steel Housing Adapter, Fiberglass Housing Adapter
SPOOL3	Stainless Steel Spool Assembly For 8" Housing
SPOOL4	Aluminum Spool Assembly For 8" Housing
RAM30	Ram Assembly
